Art Unit: 3679

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Election/Restrictions

2. Claims 1-6 have been withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in the reply filed on November 23, 2004.

Claim Rejections - 35 USC § 102

3. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Hofmann et al, US 5,525,109 (Hofmann). Fig. 1 shows a constant velocity joint comprising: a trunnion 4 defining a retaining groove; and a retaining ring 8 secured within the groove. Fig. 3 shows the retaining ring includes a fracture area 7.

4. Claims 12 & 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Orain, US 4,317,602. Fig. 5 shows a constant velocity joint comprising: a trunnion 1 defining a retaining groove 9; and a retaining ring 7, 8 secured within the groove, the ring includes a fracture (see also "split" in col. 2, line 36). The retaining ring has a first leg 8 having an inner surface; a second leg 7 having an outer surface; and a first notch (see "split" in col. 2, line 36) defined by the first leg.

Allowable Subject Matter

5. Claim 14 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. Claims 15 & 16 are allowed.

Response to Arguments

7. Applicant's arguments filed March 17, 2005 have been fully considered but they are not persuasive.

a. Applicant argues that Hofmann fails to anticipate the claims because the fracture area 7 of the retaining ring 8 is only a gap. However, in the assembled state (i.e. a constant velocity joint), applicant's fracture area 60 is broken and therefore is itself just a gap. As such, Hoffman anticipates the claimed invention – a universal joint. Applicant makes a similar unpersuasive argument with regard to Orain.

b. Applicant argues that Orain fails to anticipate the claims because the retaining ring 7, 8 of Orain is comprised of two separate parts. However, there is nothing in the rejected claims which would preclude a retaining ring comprising two separate parts from reading on those claims.

c. Applicant argues that Orain fails to anticipate the claims because Orain shows structure like that in the admitted prior art of instant Fig. 1. However, if in fact claims 12

Art Unit: 3679

& 13 read on the admitted prior art, then that is additional grounds for rejecting the claims, not for allowing them.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
